

## Do you have a VetSafe champion in your practice?

We need everyone to engage with VDS VetSafe.

All practices need to have a VetSafe Champion – please discuss with your Operations manager if you have not yet identified one.

VetSafe is the Veterinary Defence Society's confidential significant event reporting and risk management service. The VetSafe website and accompanying app capture information about incidents in practice that result in patient harm or other losses.

This information will help the VDS and its members using the system to understand why mistakes happen, provide feedback and develop solutions that improve the quality of veterinary care.

### Did you miss the 30 min VDS VetSafe webinar last week?

[Watch the video now](#), it provides an easy to follow guide on how to use VetSafe.

**The more submissions from your practice the better, so please get reporting. Like Moor Cottage where they have recently had some training on VDS VetSafe and signed the Just Culture Agreement.**

**Well done!**
